REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: US Patent 6,734,112 and paper of Chang et al are made of the record. The examiner's position is that the prior art fails to teach or fairly suggest a method and apparatus as claimed. The prior art fails to suggest cleaning and photoresist removal by gas-expanded liquids. In contrast the prior art teaches that gas-expanded liquids have lower solubility compare with liquid solvents. See the paper of Chang et al. Gas-expanded liquids are known to be used in crystallization processes with gases serving as antisolvents. An ordinary artisan would not have been motivated to use gas expanded liquids in a cleaning process because the artisan would have been expected lower dissolving power of gas-expanded liquids compare with non-expanded ones. The prior art fails to recognize that the physical properties of solvents, such as viscosity, diffusivity, and density could be modified by gas expansion according to the cleaning requirements and that cleaning properties of solvents, such as solubilization of residues, removal of photoresists, and penetration of shallow trenches could be enhanced.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexander Markoff whose telephone number is 571-272-1304. The examiner can normally be reached on Monday-Friday.
